

Repartee LX Key Benefits

- **Web-based Administration Console.** The intuitive design of the new Web Administration Console makes Repartee[®] LX system set-up and administration more efficient. Administrators can quickly navigate the Repartee LX system, set-up new accounts and run reports.
- **Fax Messaging.** Repartee LX with Active Fax[®] and ViewFax[™] allows users to access, retrieve and respond to fax messages promptly via the telephone, whether they are working from the office or traveling on the road.
- **Digital Integrations.** The Repartee LX solution provides digital emulations for Avaya, Mitel, Nortel, and Siemens telephone systems. Tight digital integrations can support powerful features, such as Caller ID or disconnect supervision.
- **ViewMail[®] for Microsoft[®] Messaging, ViewMail, ViewCall[®] Plus.** Users can increase efficiency by managing voice and e-mail messages from the desktop and prioritize incoming phone traffic.
- **Mailbox Manager.** The new Web-based interface allows users to configure and control personal mailbox settings via a Web browser in addition to using the telephone user interface. With Mailbox Manager, users can modify greetings, security codes, notification, groups, conversation preferences, and much more directly from their PC.
- **E-mail Integration and Text-to-Speech for Exchange[®], GroupWise[®] and Notes[®]** Employees are given many choices for recording and retrieving messages. Play/Record voice messages on phone or PC media device, listen to and manage e-mail messages over the phone, and select brief menus or *1 for Yes, 2 for No[™]* system prompts.
- **Hospitality.** Impress hotel guests with professional voice mail services, including up to 21 optional guest languages, automated check-in/check-out, personalized greetings, guest initiated wake-up calls, and custom guest welcome messages.
- **Networking.** The ActiveNet[®] networking package improves employee efficiency by allowing businesses to exchange messages between multiple networked locations, using AMIS or enhanced AMIS (PlusNet[™]).
